Azola Waters Rehab Pool

Commenced November 2006 | Completion June 2007

The owners of the Azola Waters Retirement Village were keen to create a pool that met the practical and recreational needs of their residents.

Enter Statewide Pool Services.

Focussing our attention on both the pool and its surroundings, we installed this pool and spa with the general health of village residents and an all pervading sense of calm in mind. With a clean modern feel, this stunning hydrotherapy pool offers the best in streamlined design with a range of practical elements. For safety purposes the pool's entry point is graded, while from a comfort standpoint, the entire environment is temperature controlled providing a comfortable swimming environment, all year round.
