

Clayton Community Centre

Commenced November 2006 | Completion May 2008

When the Monash City Council set out to create a swimming centre which would cater to the local community's health, fitness and leisure activities, Statewide Pool Services were brought on board to construct this recreational masterpiece.

The Centre incorporates a 25 metre lap pool, interactive play pool and a spa, all designed to encourage fitness and fun in a safe, aquatic environment. While the lap pool is built for durability, convenience and function, the Centre's play pool is a fantasy waterscape where water wheels tip and turn, spilling water onto the kids below. The Statewide designed 'Serpents' make a stunning interactive water feature while beach entry' makes this pool accessible for all age groups, especially toddlers still familiarising themselves with water. And while the kids and their parents are at play, the large spa offers a relaxing alternative for other Centre patrons.
